

Everything you need to know about organizing a fishing event. Available at www.catchfishing.com

Environmental

Tutorial **12** /24
EVENT PLANNING SERIES

Time should be allocated to talk to the participants about basic fishing and safety rules they should know. Information on aquatic stewardship should also be passed on to new anglers to stress their responsibility to protect and preserve the environment. Ensure that the site is left in as good condition, or better, as before the event.
